

TU Delft – Workshop GNSS

27 June 2019

www.septentrio.com

A leading developer of high-end GNSS receivers

- A Team of 100 GNSS and navigation-experts
- 19 years of uninterrupted innovation in GNSS

Founded in 2000

- Spun off from IMEC
- Major contributor to the Galileo program

Owens the complete product development cycle

- From A to Z in-house
- Researched, designed and made in Europe

Global presence

- Customers all over the world
- Across all industries and applications

Septentrio in Confidence

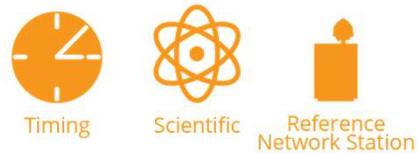

Automation

Survey and Mapping

Scientific/Reference

AsteRx-U

- ❖ Rugged construction
- ❖ Heading capable
- ❖ Robust for MC and Marine applications

Septentrio in Confidence

PolaRx5/5e

- ❖ Tracks **all visible** GNSS signals
- ❖ **NTRIP** client, server and caster
- ❖ Provides **unaltered** data

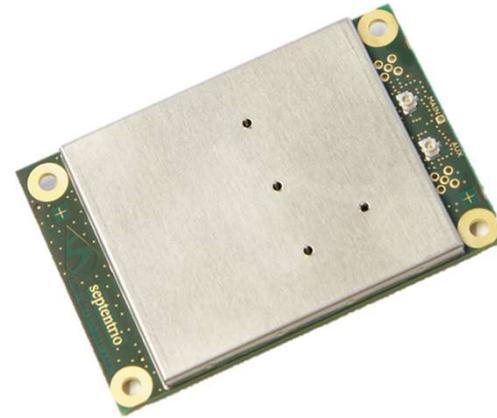

Septentrio in Confidence

OEM

AsteRx-m2/m2a

- Light and compact
- Low-power
- Seamless UAS integration

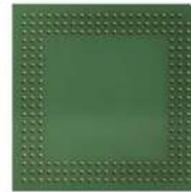

AsteRx4

- Full featured and future proof
- Scalable and flexible
- Dual antenna

Mosaic: High performance GNSS receiver in a module

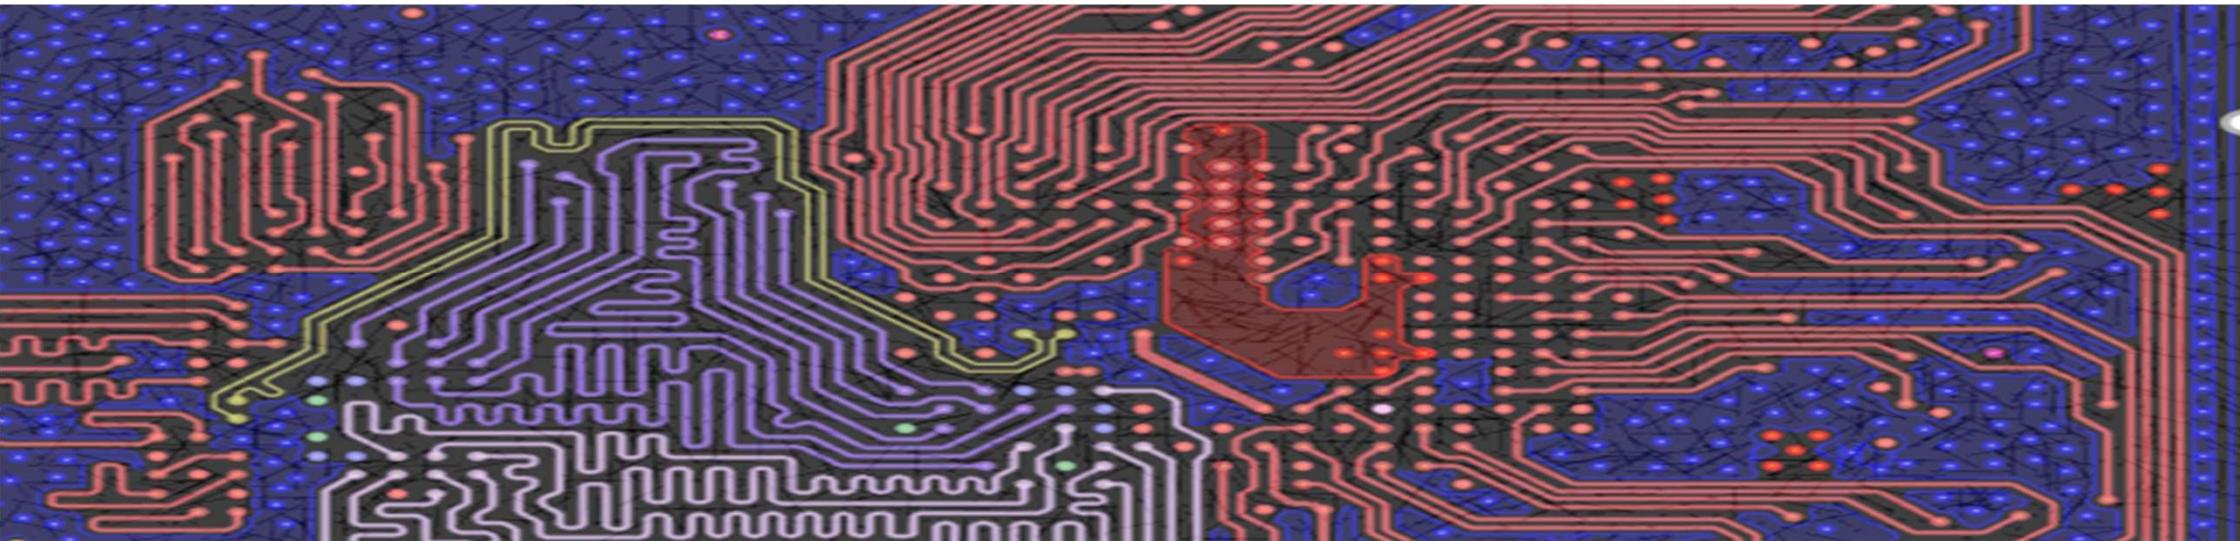

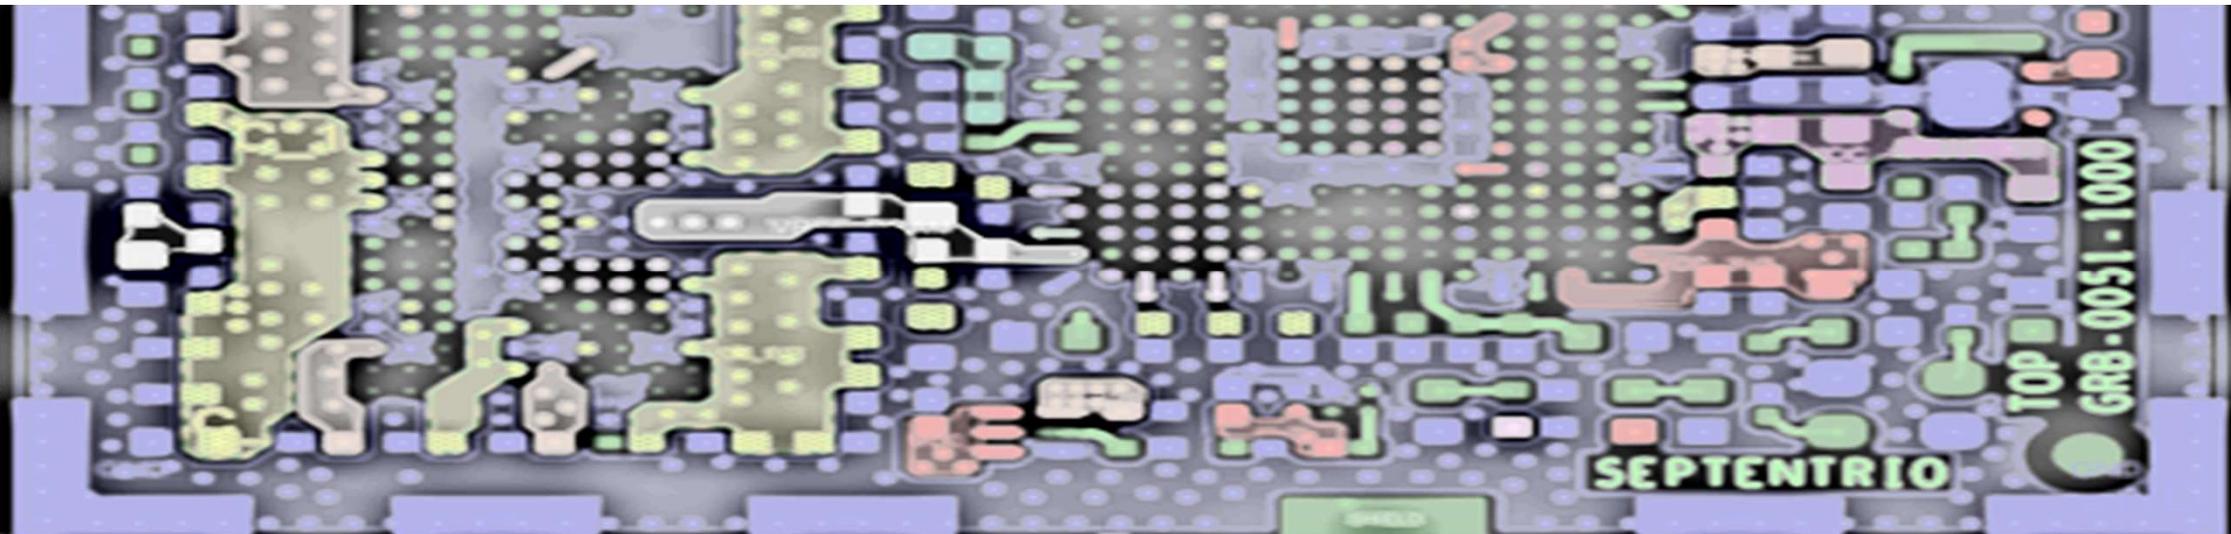

SMT (surface mount) solderable
LGA (Land Grid Array)
FR4 PCB technology

4 chips

- S-QB5 Asic
- S-GR4 Asic
- CPU i.MX6ULL
- Memory

Compact form factor
31x31mm – 7g

GNSS

GPS/GAL/GLO/BDS/QZSS/Navic

L1,L1C,L2C,L2P,L5/E1,E5a,E5b,AltBoc,**E6**/L1,L2,L3/B1i,
B1C,B2a,B2i,**B3**/L1,L1C,L2C,L5,**L6**/L5

On module L- band

Septentrio interference mitigation

Tools (Rx tools, Geotags, ppsdk...)

Interfaces

4 LVTTTL COM ports

USB device

Ethernet

4-bit SDIO for SD Card logging

3 Events

1 xPPS

...

Easy Integration

Basic application: no external components needed, no antenna circuitry needed, common terminals on outer rows for economic pcb routing

Advanced application:

Ethernet phy, mass storage card can be added directly

SWAP

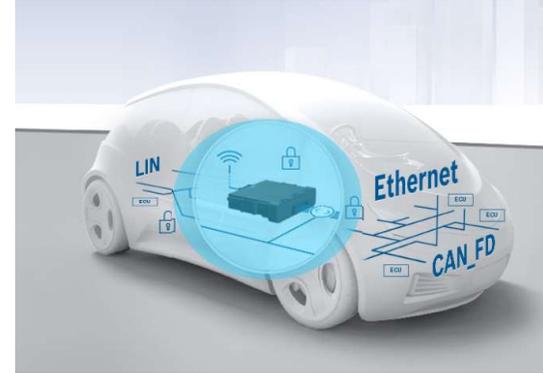

3,3V +/- 5%
700mW typical
31x31X4mm
7g

Dev kit

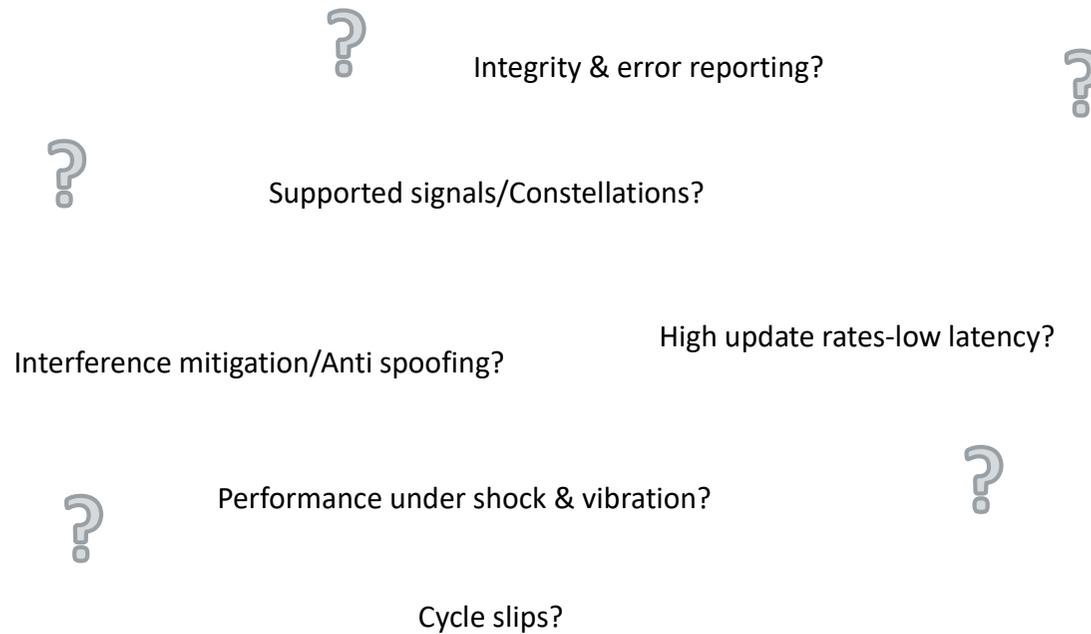

Easy plug & play to evaluate

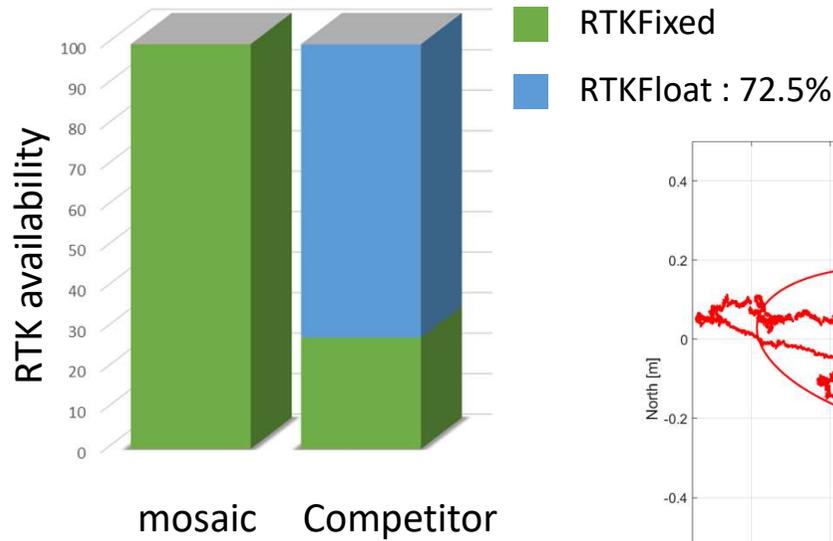

Applications

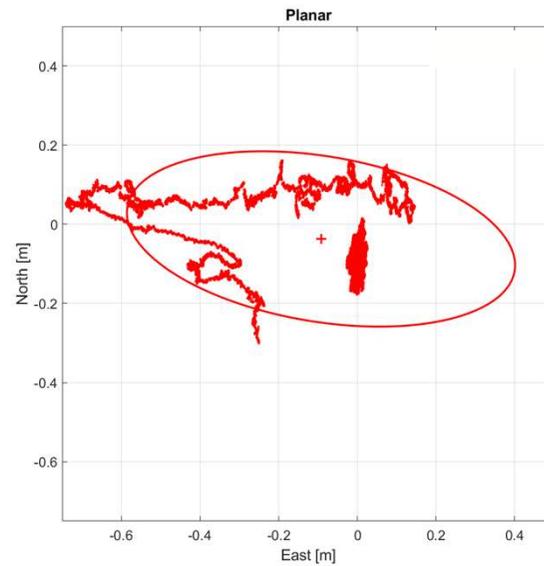

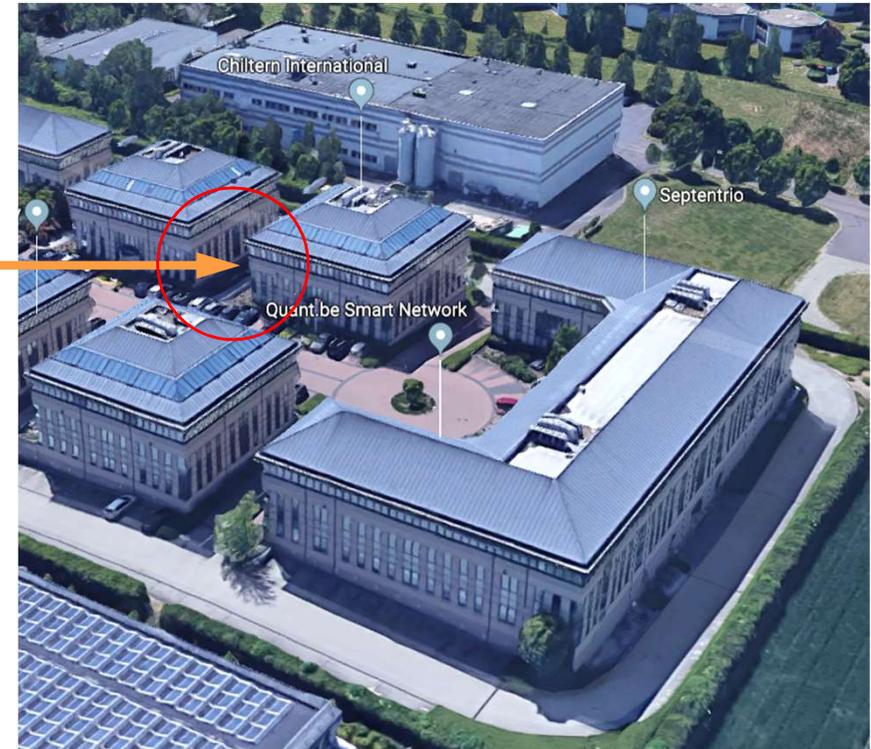

Dependable industrial solution in difficult environments?

Static Positioning

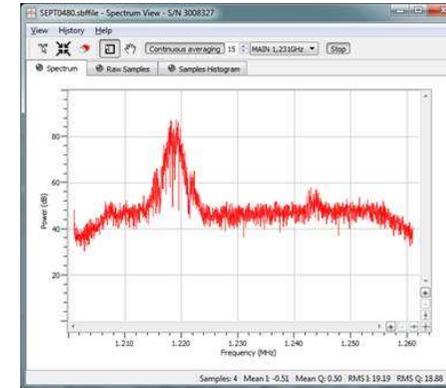

in between buildings

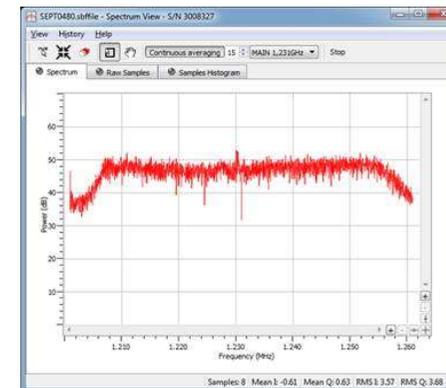

- Startup in difficult conditions results in > 1hour time to RTK Fix
- Error in RTKFloat severely underestimated

Septentrio in Confidence

AIM+ Advanced Interference Mitigation

Without AIM+

Active AIM+

Septentrio in Confidence

Septentrio in Confidence

Dependable industrial solution!

- Supported signals/Constellations
- Integrity & error reporting
- Cycle slips
- Interference mitigation/Anti spoofing
- High update rates – low latency
- Performance under shock & vibration

Thank you
